

BANNED-STYLE STIMULANTS FOUND IN SCHOOLS

School Resource Officer Rapid Visual Guide

MothersAgainstHerbalAbuse.org

What These Products Are

These stimulants include DMAA, DMHA, DMBA, AMP Citrate, Higenamine, and Vonedrine-like compounds. They appear in high-stimulant pre-workouts, fat burners, and supplement powders sold in vape shops, gas stations, and grey-market websites. Labels may conceal banned or undisclosed stimulant analogs.

Why SROs Should Be Alert

- Sold in vape shops and gas stations despite FDA bans
- Marketed as high-stimulant pre-workouts or fat burners
- Labels may hide DMAA or DMHA analogs or prohibited beta-agonists
- Students may carry tubs, pills, or sample packets
- Reported effects: jitteriness, rapid pulse, overheating, fainting
- Products frequently rebrand to evade enforcement

Examples of Banned or Flagged Ingredients

DMAA: Jack3d, OxyElite Pro, Dark Energy, Mesomorph (old), Craze

DMHA: Dust X, Excelsior, Herolean, Crack Gold Reloaded, Woke AF (older)

DMBA or AMP Citrate: Mesomorph (intermediate), Unstoppable v2, Anarchy, Flashbang

Higenamine: Hyde, Nitraflex, Oxyshred Hardcore, Diablo, Vyper X

Vonedrine-like: Hydroxyelite (illegal), Lipodrene Elite, Stimerex Hardcore

Highest-Risk Products for SROs

Common in Vape Shops: Dust X, Excelsior, Crack Gold, Darkside Ultra, Herolean, Lemon Drop Hardcore

Brought to Gyms by Teens: Woke AF (older), Hyde, Nitraflex, Oxyshred Hardcore

Most Likely to Hide Undisclosed Analogs: Dark Energy, Stimaholic, God of Rage, Mesomorph (older)
